Crawford Has Successfully Tried Cases Or Effected Settlements For Several Clients In Excess Of \$1,000,000.00. Referrals From Past Clients Are Critical To Our Success.

Gordon R. Crawford & Associates Will Be Participating With National Law Firms in the Paraquat & Parkinson's Disease Litigation

Paraquat is an industrial weed-killing herbicide used primarily in farming. Most often used as a spray, paraquat has caused illness or death through direct ingestion as well as accidental exposure.

As more weeds become resistant to Roundup, paraquat's usage continues to increase. Paraquat is sold under various trade names including: Parazone, Para-Shot, Quick Quat, Gramxone, Helmquat, Firestorm, and others.

The National Institutes of Health (NIH) found in a 2011 study that people exposed to paraquat are nearly 2 1/2 times more likely to develop Parkinson's Disease. Parkinson's Disease is a disorder of the central nervous system that affects movement, often in the form of tremors, stiffness, or loss of balance. Certain medications can help control the symptoms of Parkinson's Disease, but there is no cure.

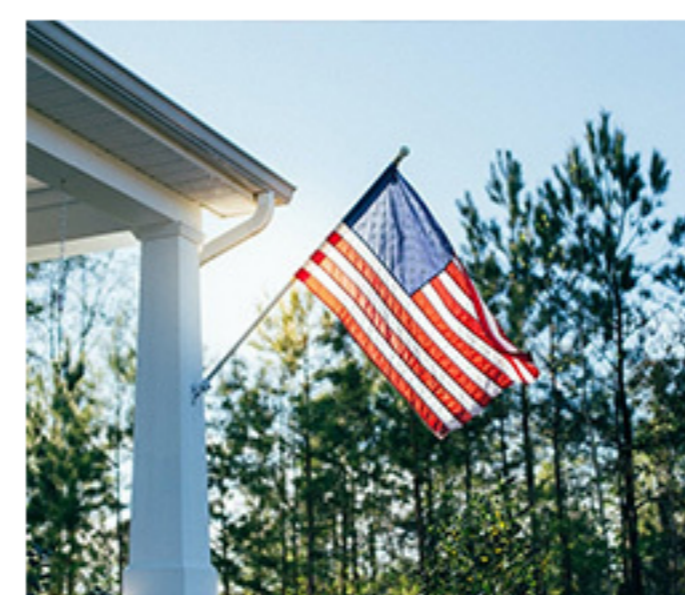

Lawsuits are being filed alleging that Syngenta, Chevron, and other companies involved in manufacturing, marketing, and distributing of paraquat are liable for causing or contributing to the development of Parkinson's Disease.

If you or a loved one has developed Parkinson's Disease or other serious side effects resulting from paraquat exposure, please call us today for a free confidential case evaluation.

What Are The Common Causes Of Auto Accidents In Louisiana?

The driver's inattention or distractions, such as texting, talking on cell phones, changing settings on the radio or other accessories, minding the needs of children in the vehicle, or a physical dispute or arguing with a passenger...

What To Look For In Natural Mosquito Repellents

People are usually prone to mosquito bites due to a combination of scent, light, heat, and humidity. If you're a mosquito magnet, you're probably tired of having itchy, bumpy skin. Different species of mosquitoes — like the ones that carry malaria — prefer bacteria and sweat. Others are attracted to carbon dioxide and certain hand odors...
